## India auto sales seen rising 7-9% in FY24: Passenger & commercial vehicles to drive demand

- The Indian auto industry is expected to register sales volume growth of 7-9% in FY24, building on the robust momentum of FY23, according to a report by CareEdge.
- Despite a challenging global environment in FY23, Indian auto companies made the most of the first disruption-free year after the Covid-19 pandemic. Overall, domestic sales rose 21% year-on-year in the 11 months of FY23 when compared to the same period in FY22.
- “Over the long term, opportunities in the electric vehicle market, premiumisation of vehicles, a focus on localisation, improved export potential, and changes in regulatory norms will result in healthy growth for auto component suppliers,” ICRA said.
- Sales in the two-wheeler (2W) segment have stagnated in the past three months due to factors like continued price hikes, hot inflation and weakness in rural demand. Bajaj Auto, which depends heavily on exports, also bore the brunt of weakness in key foreign markets like Nigeria. Its exports declined to 45% of its total sales in February 2023, from 52% in January 2022.
